

Hello Streamside Stewards,

In the past month or two you've received a few messages from us about helping us know what's going on with your property. In the age of COVID-19, when restoration crews are small and limited, we need your help to be our eyes and ears and help us know which sites need care and when.

You may have heard from Alexis as we seek these site updates, and can follow up with her directly. Here are resources and requests:

1. Please fill out the short "[Quarterly Restoration Update](#)" form that tells us how your project area is doing;
 - a. Resource: Your [Weed Guide](#) with photos of invasive plants to keep an eye out for.
2. Take **Photo Points** (photos from the same location over time, to show how things grow & change) and email to coordinator@ncwc.org;
 - a. Resource: [Photo Monitoring Guide for SSP](#) with tips on taking replicable photos.
3. If there are weeds that you can pull by hand (some can be pulled manually, some can't) try to manage those yourselves if you can. But be sure you know what it is first: when in doubt, ask.
 - a. Resource: Your [Weed Guide](#) has clickable links to further information including ID help.

Feel welcome to contact Alexis with questions - cell: 530 (not 503) 902-7528, alexis.barton3@gmail.com.

Thank you!

- Neil & Alexis
